

Design Office

Armitec supports you in the management of your projects from the initial design stage thanks to its design office.

Assistance for your projects:

- Mechanical
- Automation
- Boilermaking and industrial piping

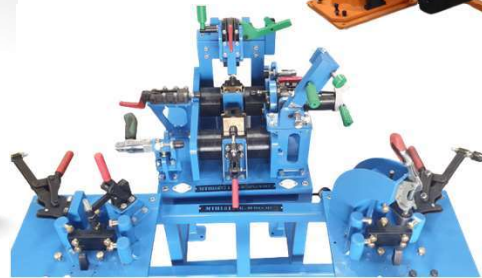

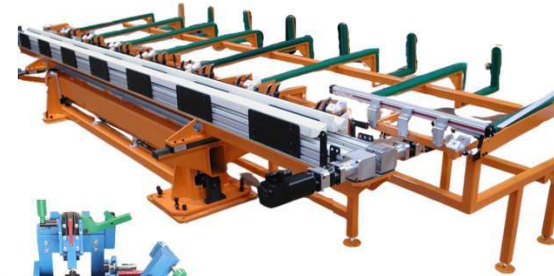

All projects designed within our design office can be carried out within our workshops. We then proceed to assembly on our customers' site.

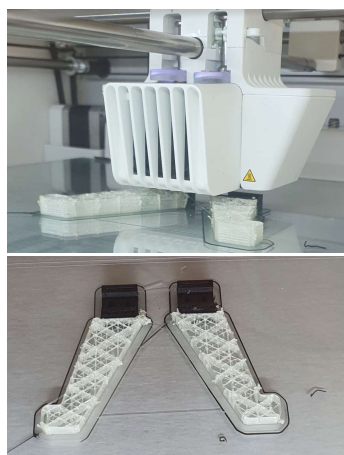

Our services

- Feasibility study
- Pre-Projects
- Calculation note
- Technical File
- Instructions
- Industrial Monitoring

 SOLIDWORKS

3D printing

- Rapid and functional prototyping for complex parts
- Validation of projects carried out in CAD
- Choice of additional subjects

Tooling designed for a client in the automotive sector
