

NUCLEAR

Contact: Mr. Bertault

Armitec has been deploying its professional skills in **machining, boilermaking and maintenance since 1996** in numerous industrial sectors, aeronautical agri-food, defense, environment, etc. and has been working on **nuclear sites since 2019**.

A team of technicians qualified and aware of this **specific environment is assigned to a nuclear power plant in Chinon**.

With the workshops in Saint-Viaud and Beaumont-en-Véron, the team benefits from operational support in case of need for spare parts and renovation or even for specific manufacturing.

Production in the workshop

- Design of electrical cabinets and boxes
- Production of mechanically welded frames
- Various services improvement

On-site services

- Production on plan
- Manufacturing of **test tubes and expert samples**
- **Specific assembly** and integrated services in **machining and small boilermaking** (recovery of scope, etc.)
- Maintenance of **machine tools** (camera, nuclearization of machines, etc.)
